

ELSEVIER

Author Index Volume 155 (2003)

- Aptekarev, A.I.** and **A. Branquinho**, Padé approximants and complex high order Toda lattices 231–237
- Argyros, I.K.**, On a theorem of L.V. Kantorovich concerning Newton's method 223–230
- Barone, P.**, Orthogonal polynomials, random matrices and the numerical inversion of the Laplace transform of positive functions 307–330
- Branquinho, A.**, see **Aptekarev, A.I.** 231–237
- Butler, R.W.** and **A.T.A. Wood**, Laplace approximation for Bessel functions of matrix argument 359–382
- Cao, J.** and **R. Gardner**, Restrictions on the zeros of a polynomial as a consequence of conditions on the coefficients of even powers and odd powers of the variable 153–162
- Cash, J.R.**, **D.R. Moore**, **N. Sumarti** and **M. Van Daele**, A highly stable deferred correction scheme with interpolant for systems of nonlinear two-point boundary value problems 339–358
- Cusimano, C.** and **S. Stanley**, Circular Bernstein–Bézier spline approximation with knot removal 177–185
- Dai, X.**, **Y. Diao**, **Q. Gu** and **D. Han**, Frame wavelet sets in \mathbb{R}^d 69–82
- Dai, X.**, **Y. Diao**, **Q. Gu** and **D. Han**, The existence of subspace wavelet sets 83–90
- Damelin, S.B.**, On the maximum modulus of weighted polynomials in the plane, a theorem of Rakhmanov, Mhaskar and Saff revisited 455–459
- Diao, Y.**, see **Dai, X.** 69–82
- Diao, Y.**, see **Dai, X.** 83–90
- Dikshit, H.P.**, Pál-type interpolation on nonuniformly distributed nodes on the unit circle 253–261
- Gardner, R.**, see **Cao, J.** 153–162
- Gu, Q.**, see **Dai, X.** 69–82
- Gu, Q.**, see **Dai, X.** 83–90
- Gu, Y.**, **W. Liao** and **J. Zhu**, An efficient high-order algorithm for solving systems of 3-D reaction–diffusion equations 1–17
- Han, B.**, Compactly supported tight wavelet frames and orthonormal wavelets of exponential decay with a general dilation matrix 43–67
- Han, D.**, see **Dai, X.** 69–82
- Han, D.**, see **Dai, X.** 83–90
- Hardin, D.** and **D. Hong**, Construction of wavelets and prewavelets over triangulations 91–109
- He, T.-X.**, **R. Zhang** and **Y.S. Zhou**, Boundary-type quadrature and boundary element method 19–41
- He, Y.**, **Y. Lin**, **S.S.P. Shen**, **W. Sun** and **R. Tait**, Finite element approximation for the viscoelastic fluid motion problem 201–222
- Hong, D.**, see **Hardin, D.** 91–109
- Hong, D.**, see **Liu, H.-W.** 187–200
- Kainhofer, R.**, QMC methods for the solution of delay differential equations 239–252
- Lakey, J.D.** and **Y. Wang**, On perturbations of irregular Gabor frames 111–129
- Lam, K.Y.**, see **Liu, M.B.** 263–284
- Lecko, A.** and **A. Wiśniowska**, Geometric properties of subclasses of starlike functions 383–387
- Liao, W.**, see **Gu, Y.** 1–17
- Lin, E.-B.** and **Y. Ling**, Image compression and denoising via nonseparable wavelet approximation 131–152
- Lin, Y.**, see **He, Y.** 201–222
- Ling, Y.**, see **Lin, E.-B.** 131–152
- Liu, G.R.**, see **Liu, M.B.** 263–284
- Liu, H.-W.** and **D. Hong**, An explicit local basis for C^1 cubic spline spaces over a triangulated quadrangulation 187–200
- Liu, M.B.**, **G.R. Liu** and **K.Y. Lam**, Constructing smoothing functions in smoothed particle hydrodynamics with applications 263–284
- Martín del Rey, A.** and **J. Muñoz Masqué**, Reducing $y'' = F(x, y, y')$ to first order 389–404
- Moore, D.R.**, see **Cash, J.R.** 339–358
- Moudafi, A.** and **M. Oliny**, Convergence of a splitting inertial proximal method for monotone operators 447–454
- Muñoz Masqué, J.**, see **Martín del Rey, A.** 389–404
- Oliny, M.**, see **Moudafi, A.** 447–454
